

Website stores maintainer/developer required.

I have a short-term vacancy for a PT website maintainer/developer with some SEO experience and ability to integrate inventory with various platforms (Prestashop, eBay, Trademe) and to maintain our websites (there's 3, one in Oz which is the main one but two new ones in NZ and the UK as well). The work will include photographing inventory, loading these photos up to the platforms, some Excel, website design, javascript and sql & php. You will need to get results so a good knowledge of SEO is required. Currently the Oz shop is the only one trading but at fairly low levels. There are no current sales in the UK or NZ so you have adequate room to improve sales in all locations. The sites are set up to allow customers to pay electronically with both Paypal and eWay. Inventory is physically in place in all three locations.

I would prefer for you to start around the 19/20th October and there will be about 20-25 hours a week up to about the 18th December (i.e. 3 days a week, adaptable on which days they are). Possibility that there might be a few months full-time work in the new year but that's pretty vague at the moment. You will need to be based in Dunedin, this is not a job that can be done remotely.

Compensation negotiable depending on experience.
