

6 Any other comments about Yawen's teaching?

- 5) Yawen has been so fantastic at teaching, an absolute pleasure to learn from. She regularly makes use of entertaining but educational videos, has exercises for students in every lecture (and works through them step by step) and has mentioned every lecture that she's available for queries no matter how big or small. Her lectures are very well organised and manages to cram huge amounts of content in without it being too overwhelming. She really goes the extra mile and is an absolute resource to all teachers and students here at Otago.
- 11) she was algood.
- 13) Well, I really enjoy her lesson.
- 14) Very well rounded and informative while still fitting within the 50 minute timeframe. Yawen makes good use of slides, practical demonstrations and videos on the topics discussed leading to my understanding of the topic being reinforced greatly. Overall she has been a great lecturer and has made me much more interested in this course than I originally was.
- 15) It was definitely helpful to see the Python scripts being run and debugged during the lectures
- 19) I have spent more time doing crosswords and writing chemistry reports in lectures than I have been taking notes. I understand that this is an introductory paper but even then it is a little slower than it needs to be for me personally.
- 20) nice teaching, good personality

Additional Question(s)

7	Did Yawen make good use of examples, illustrations, or other techniques to explain difficult concepts?	Regularly	1	2	3	4	5	Rarely	NIL	Median
